

# Propagation Analysis (KS-KCY5421)

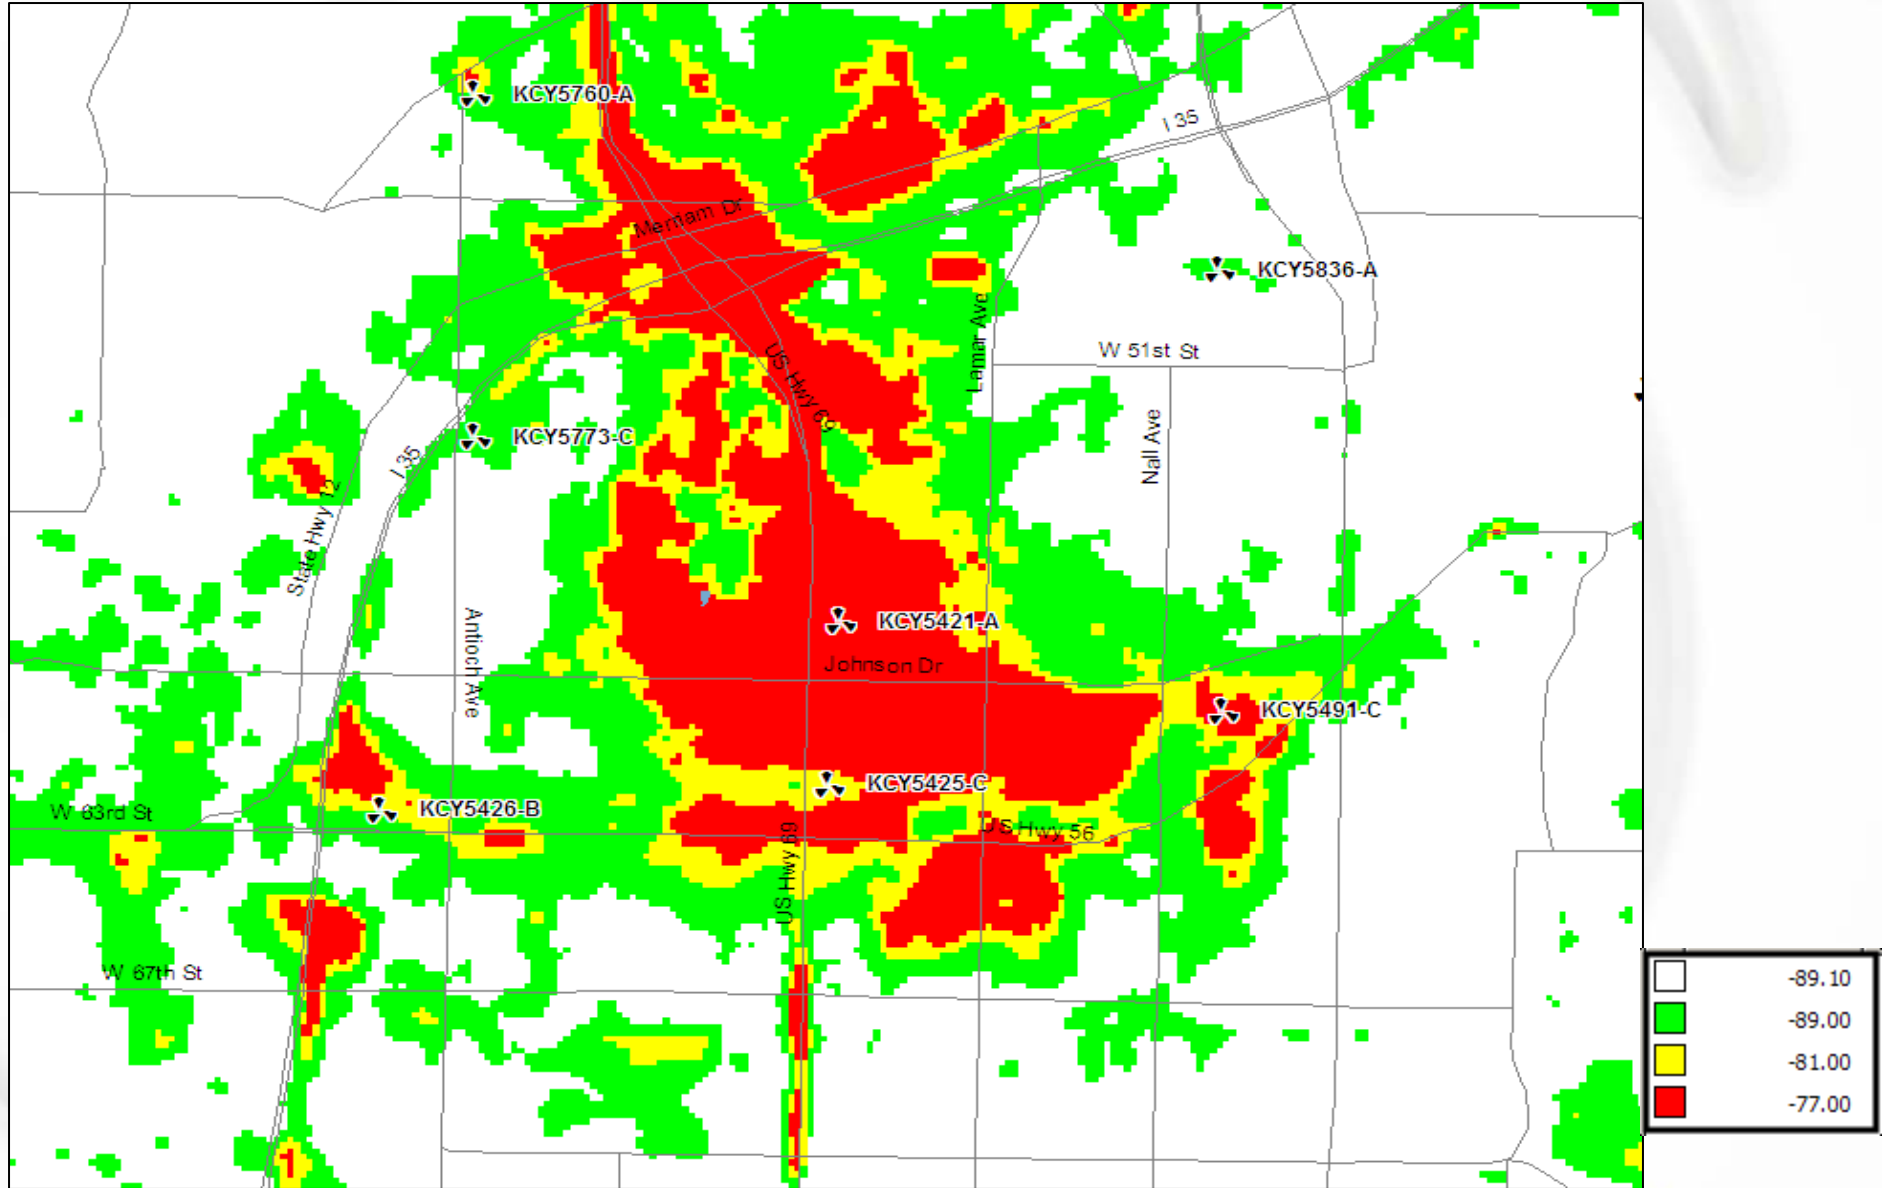

# Coverage without 5421

# Coverage with 5421

# KCY-5421 w/o surrounding sites

# Comments

- The analysis shows that without site 5421 there is a significant coverage loss over a large area, especially north along Metcalf/69Hwy.
- 2624 MHz to 2657MHz is the frequency range that would be propagated.
