City of Mission Fence Requirements
From Sections 505.042.D and 415.040

Fence Permit Applications are required for any new fence, an extension of an existing fence or when more than 50% of an existing fence is being replaced.

The maximum height of a fence in the front yard or exterior side yard on a corner lot shall be (3) feet. Only decorative fencing may be built in these yards. A decorative fence is an open fence other than chain link intended to decorate, accent or frame a feature of the landscape rather than prohibit entry or retain occupants. Examples of decorative fencing are split rail, wrought iron, picket, and similar open fences.

The maximum height of a fence in the rear yard or interior side yard on all lots shall be six (6) feet. Fences may be for decorative or privacy and security purposes.

The smooth side of the fence must face the neighboring property.

Electric, barbed wire razor ribbon, barbed wire or other similar fences are prohibited in all zoning districts.

In the interest of safety, every attempt shall be made to eliminate blind corners near all drive and street intersections. Nothing shall discourage or prohibit the landscaping, planting or screening of other areas that are not hazardous to traffic.
