

SUSTAINABLE MISSION

Making a sustainable difference in Mission, Kansas

OUR MISSION

Our mission is to advocate for policies and actions that encompass People, Planet, and Prosperity in order to incorporate sustainable practices in our community.

Sustainability is a holistic approach to living and problem solving that addresses social equity, environmental health, and economic prosperity.

To be sustainable, the economy must support a **high quality of life** for all people in a way that protects our health, our limited natural resources, and our environment.

Environmental, economic, and social goals need to be **engaged simultaneously in decision-making** to maintain a high quality of life for current and future generations.

THE TRIPLE BOTTOM LINE

- Does this decision work well for **our economy**?
- Does this decision work well for the **people of our community**?
- Does this decision work well for the **natural environment**?

If not, it is not a sustainable choice.

FOCUS AREAS

Economic Development

Healthful Living

Public Engagement

Housing Resource

Conservation

Collaboration

Land Use

Accessibility

Social Equity

2015 PLAN INITIATIVES

FORMALIZE DEVELOPMENT SCORECARD

The Commission created a “Development Scorecard” to evaluate the sustainability of proposed projects. In 2015, we will collaborate with the Planning Commission and evaluate how to incorporate this step more fully into Mission’s site plan reviews.

REVIEW COMPREHENSIVE PLAN

In 2015, Mission will be revising its comprehensive plan, a document which will define the development and land use priorities of the city for years to come. We will ensure that sustainable principles are a key cohesive element of the plan.

ENHANCE ACCESSIBILITY AND MOBILITY

It is important to build on Mission’s past successes in creating a livable and accessible community. We will continue to advocate for the expansion of programs and features that make Mission more accessible to its diverse population of residents and visitors.

CONTINUE ONGOING ACTIVITIES

We will keep advancing accepted sustainable practices in our community. We will continue to promote these to broad audiences through a variety of methods and activities. We will also continue to support key community events.
