Appendices

Appendix A - Map of Permitted Area

Appendix B - Tables 1-6 Planned BMPs for Permit Compliance
SECTION 1: INTRODUCTION

This document is a Stormwater Management Plan (SMP, or the “Plan”) created to help reduce the discharge of pollutants in stormwater runoff from the Municipal Separate Storm Sewer System (MS4) within regulated areas of Mission, Kansas (Map of permitted area included in Appendix A). It outlines stormwater program activities, monitoring requirements, reporting requirements, and responsible parties for implementing this work.

This plan was prepared in compliance with Kansas Permit Number M-KS45-SU01 (hereinafter “the permit”) issued to the City by the Kansas Department of Health and Environment (KDHE) to fulfill requirements of the Clean Water Act.

Permit Effective Date: October 1, 2019

Permit Expiration Date: September 30, 2024

The SMP is designed to:

1. Reduce the discharge of pollutants from the MS4 to the Maximum Extent Practicable (MEP).
2. Implement the Six (6) Minimum Control Measures as listed in Part I Section C of the permit:
   a. The Six Minimum Control Measures are:
      i. Public Education and Outreach,
      ii. Public Participation and Involvement,
      iii. Illicit Discharge Detection and Elimination,
      iv. Construction Site Stormwater Runoff Control,
      v. Post-Construction Stormwater Management in New Development and Redevelopment Projects, and,
      vi. Pollution Prevention/Good Housekeeping for Municipal Operations.
3. Implement Best Management Practices (BMPs) to reduce to the MEP the discharge of the Total Maximum Daily Load (TMDL) regulated pollutants from the MS4 to the watershed of the impaired stream and/or lake as listed in the Permit.
4. And, satisfy the requirements of the permit, the Clean Water Act, and the Kansas surface water quality statutes and regulations.

Implementation of BMPs consistent with the provisions of the SMP document and this permit constitutes compliance with the standard of reducing pollutants to the Maximum Extent Practicable.

The City of Mission Public Works department (Celia Duran, Public Works Director) will have overall responsibility for coordination of activities outlined in this Plan, reporting, and submitting all documents (Stormwater Management Plan (and updates) and Annual Report) to KDHE.
SECTION 2: SIX MINIMUM CONTROL MEASURES

This section describes the six minimum water quality protection control measures that are required by all MS4 permits. They include the following:

1. Public Education and Outreach
2. Public Involvement and Participation
3. Illicit Discharge Detection and Elimination
4. Construction Site Stormwater Runoff Control
5. Post-Construction Stormwater Management in New Development and Redevelopment
6. Pollution Prevention/Good Housekeeping for Municipal Operations

2.1 MINIMUM CONTROL MEASURE 1 (MCM 1) - PUBLIC EDUCATION AND OUTREACH

Description

MCM 1 consists of implementing a public education program to inform individuals, businesses, and organizations about the impacts of stormwater discharges on surface water quality and how they can help reduce pollutants in stormwater runoff. This may include distribution of educational materials to the community and/or conducting outreach activities.

Benefit

An informed public increases awareness of water quality issues in both residents and businesses, creates opportunities for the public to take direct action to improve the health and sustainability of their community, and builds support for program goals making initiatives more effective.

Compliance

Compliance with the public education and outreach minimum control measure requires implementation of BMPs in Part I., Section C.1 of the Permit for a minimum of 4 points total on an annual basis for each calendar year 2021 and 2022. The minimum point total requirement increases to 7 points beginning in year 2023.

A table containing the BMP summary, the measurable goal, the implementation schedule, and points per activity is included in Appendix B: Table 1.

A short description of each planned BMP is included in the table below.
<table>

</tr>
<tr>
<td>P Ed &amp; O - 08</td>
<td>Provide stormwater education for students at a school campus within K-12 (those grades present at the campus) within the permittee’s jurisdiction or within 30 miles from this permit area. Alternately, funding stormwater BMP installations and/or field trips at the school campus will qualify.</td>
<td>3 3 3 3</td>
</tr>
</tbody>
</table>

*Total points per year* 11 10 10 10
2.2 MINIMUM CONTROL MEASURE 2 (MCM 2) - PUBLIC INVOLVEMENT AND PARTICIPATION

Description
This minimum control consists of creating opportunities for individuals and organizations to provide public comment and recommendations regarding BMPs and measurable goals and participate in the development and implementation of BMPs to reduce the contamination of stormwater. This program must also comply with state and local public notice requirements.

Benefit
The goal of the stormwater management plan is to improve water quality in local lakes and rivers, which provides benefits to the entire community. As such, the community deserves to have an opportunity to voice opinions on the content of the plan. Further, input into decisions builds support for and ownership in outcomes. MCM 2 also provides opportunity to the community to participate in activities, such as park or stream bank clean-up events, that help to remove pollutants from the MS4.

Compliance
Compliance with the public involvement and participation minimum control measure requires implementation of BMPs in Part I., Section C.2 of the Permit for a minimum of 3 points total on an annual basis for each calendar year 2021 and 2022. The minimum point total requirement increases to 6 points beginning in year 2023.

A table containing the BMP summary, the measurable goal, the implementation schedule, and points per activity is included in Appendix B: Table 2.

A short description of each planned BMP is included in the table below.

2.3 MINIMUM CONTROL MEASURE 3 (MCM 3) - ILLICIT DISCHARGE DETECTION AND ELIMINATION

Description
This minimum control consists of developing, implementing, and enforcing a program to detect and eliminate illicit wastewater discharges or other non-stormwater discharges into the storm sewer system. KDHE requires this program to include, at a minimum:

- Developing a storm sewer system map of the permitted MS4 showing the location of all outfalls, either pipes or open channel drainage, and showing the names and locations of all streams or lakes that receive discharges from those outfalls.

- Enacting and enforcing an ordinance or resolutions to prohibit non-stormwater discharges into the storm sewer system. The City of Mission passed pollution prevention regulations (Ordinance No. 1201, Municipal Code Article XVI Stormwater Pollution Prevention) on May 10, 2006 to regulate unlawful discharges into streams and the storm drain system.

- Informing public employees, businesses, and the general public of hazards associated with illegal discharges and improper disposal of waste.

- Developing and implementing a plan to detect and address prohibited non-stormwater discharges.

Benefit
Direct discharges of waste streams can present significant localized impacts to both public health and the environment. Developing legal, technical, and educational means to eliminate illicit discharges provides direct benefits to water quality, the environment, and public health.

Compliance
Compliance with the illicit discharge detection and elimination minimum control measure requires implementation of BMPs in Part I., Section C.3 of the Permit for a minimum of 5 points total on an annual basis for each calendar year 2021 and 2022. The minimum point total requirement increases to 7 points beginning in year 2023.

A table containing the BMP summary, the measurable goal, the implementation schedule, and points per activity is included in Appendix B: Table 3.

A short description of each planned BMP is included in the table below.
Table 3. Planned BMPs to meet MCM 3 requirements

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>ID D &amp; E - 03</td>
<td>Develop a spill response plan and, if appropriate, coordinate emergency response with other agencies or organizations.</td>
<td>3   2   2   2</td>
</tr>
<tr>
<td>ID D &amp; E - 04</td>
<td>Implement a program to evaluate MS4 outfalls to identify illicit discharges. Inspect at least 5% of the known MS4 outfalls during a calendar year and evaluate the ones which have dry weather discharges. Evaluate the water quality of the dry weather discharges to recognize non-stormwater contributions and trace the source of any illicit discharge.</td>
<td>1   1   1   1</td>
</tr>
<tr>
<td>ID D &amp; E - 07</td>
<td>Implement a Household Hazardous Waste Collection Program (HHWCP) or document others have implemented such a program to provide such service to all property owners or residents located within the permit area.</td>
<td>3   3   3   3</td>
</tr>
<tr>
<td>ID D &amp; E - 10</td>
<td>Inspect 5% of the MS4 system stormwater inlets and/or outfalls within the permit area all conducted within a 12-month period to aid in identifying illicit discharges. If in a 12-month period 15% of the MS4 system inlets and/or outfalls are inspected a higher point value may be claimed in the year the required percentage of inspection are completed</td>
<td>3* 3* 3* 3*</td>
</tr>
</tbody>
</table>

*Total points per year* 10 9 9 9

*Note: 3 points may be claimed for inspection of 2% of the MS4 system in the year the required percentage of inlets and/or outfalls are finally inspected. Alternatively, if 15% of the MS4 system is inspected 5 points may be claimed.*
2.4 MINIMUM CONTROL MEASURE 4 (MCM 4) - CONSTRUCTION SITE STORMWATER RUNOFF CONTROL

Description
This minimum control includes developing, implementing, and enforcing a program to reduce pollutants in any stormwater runoff to the MS4 for construction sites disturbing one acre or more, including areas that are less than one acre but are part of a larger common plan for development that disturbs one or more acre. KDHE requires this program to include:

- Where permittees have the authority to do so, ordinances or resolutions shall be enacted to require erosion and sediment controls, as well as sanctions to ensure compliance. The City of Mission passed erosion and sediment control regulations (Ordinance No. 1181, Municipal Code Article XVII Erosion and Sediment Control Regulations) on November 9, 2005 to regulate runoff pollution from active construction sites disturbing more than one acre.

- Requirements for construction site owners or operators to implement erosion and sediment control BMPs.

- Requirements for construction site owners or operators to control waste at construction sites that are likely to cause adverse impacts to water quality.

- Procedures for site plan review which incorporate consideration of potential water quality impacts.

- Procedures for receipt and consideration of information submitted by the public.

- Procedures for site inspection and enforcement of control measures.

Benefit
If left uncontrolled, land disturbance activities can generate significant loads of sediment which can impact both adjoining properties and downstream water bodies. Fortunately, effective controls are easy and cost-effective to implement.

Compliance
Compliance with the construction site stormwater runoff control minimum control measure requires implementation of BMPs in Part I., Section C.4 of the Permit for a minimum of 4 points total on an annual basis for each calendar year 2021 and 2022. The minimum point total requirement increases to 6 points beginning in year 2023.

A table containing the BMP summary, the measurable goal, the implementation schedule, and points per activity is included in Appendix B: Table 4.

A short description of each planned BMP is included in the table below.
<table>
<thead>
<tr>
<th>BMP ID</th>
<th>BMP Summary</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS SR C - 01</td>
<td>Implement a requirement for a Soil Erosion and Sediment Control (SESC) Plan for any land disturbance sites which are either equal to or greater than 1 acre or for which there is construction activity disturbing less than one acre which is part of a larger common plan of development or sale that in total disturbs one acre or more.</td>
<td>3 2 2 2</td>
</tr>
<tr>
<td>CS SR C - 02</td>
<td>Develop and adopt a design manual for erosion and sediment control BMPs which are required to be used on sites which will be disturbed and are either equal to or greater than 1 acre or for which there is construction activity disturbing less than one acre which is part of a larger common plan of development or sale that in total disturbs one acre or more.</td>
<td>3 2 2 2</td>
</tr>
<tr>
<td>CS SR C - 03</td>
<td>Provide access to at least one training class for contractors, developers or others involved with land disturbance projects which provides training on requirements for a Stormwater Pollution Prevention Plan (SWP2 Plan) and implementation of appropriate BMPs.</td>
<td>3 3 3 3</td>
</tr>
<tr>
<td>CS SR C - 04</td>
<td>Develop a site plan review process which considers potential water quality impacts which may occur during construction as well as post construction impacts.</td>
<td>3 2 2 2</td>
</tr>
<tr>
<td>CS SR C - 05</td>
<td>Establish effective requirements for construction sites to control wastes. Develop through ordinance or other enforceable means requirements for construction site operators or owners to control wastes. At a minimum control shall be imposed to prevent entry into the MS4 for the following wastes: discarded building materials, concrete truck washout, chemicals, litter, and sanitary waste.</td>
<td>3 2 2 2</td>
</tr>
<tr>
<td>CS SR C - 06</td>
<td>Develop written procedures for inspection of construction sites. Develop a Stormwater Construction Site Inspection Guide for use by municipal inspectors.</td>
<td>3 2 2 2</td>
</tr>
</tbody>
</table>

Total points per year 18 13 13 13
2.5 MINIMUM CONTROL MEASURE 5 (MCM 5) - POST-CONSTRUCTION STORMWATER MANAGEMENT IN NEW DEVELOPMENT AND REDEVELOPMENT

Description
This minimum control requires the development, implementation, and enforcement of a program to address post-construction stormwater runoff controls from both new development and redevelopment projects disturbing one acre or more, including projects that are less than one acre but are part of a larger common plan for development that disturbs one or more acre. KDHE requires the program to include:

- For permittees that have the authority, ordinances or resolutions to address post-construction runoff from new development and redevelopment projects to the extent allowable under state and local law.
- BMPs to prevent or minimize adverse water quality impacts.
- Strategies which include a combination of structural and/or non-structural BMPs appropriate for the municipality.
- Means to ensure adequate long-term operation and maintenance of BMPs.

Benefit
Conversion of native landscape to developed landscape increases both the volume of runoff and pollutant loads in stormwater. The consequences can include erosion, flooding, and pollution, impacting both downstream property owners and public infrastructure. Stormwater controls included in development sites can help reduce impacts and costs to both private property owners and the public.

Compliance
Compliance with the post-construction stormwater management in new development and redevelopment minimum control measure requires implementation of BMPs in Part I., Section C.5 of the Permit for a minimum of 5 points total on an annual basis for each calendar year 2021 and 2022. The minimum point total requirement increases to 7 points beginning in year 2023.

A table containing the BMP summary, the measurable goal, the implementation schedule, and points per activity is included in Appendix B: Table 5.

A short description of each planned BMP is included in the table below.

2.6 MINIMUM CONTROL MEASURE 6 (MCM 6) - POLLUTION PREVENTION/GOOD HOUSEKEEPING FOR MUNICIPAL OPERATIONS

Description

MCM 6 requires the development and implementation of an operation and maintenance and training program to reduce and prevent stormwater pollution from public facility operations such as park and open space maintenance, fleet and building maintenance, new construction and land disturbance, and stormwater system maintenance.

Benefit

Leading by example on public facilities and projects provides an opportunity to demonstrate and teach proper techniques to other landowners, and it is available on a routine and ongoing basis.

Compliance

Compliance with the post-construction stormwater management in new development and redevelopment minimum control measure requires implementation of BMPs in Part I, Section C.5 of the Permit for a minimum of 4 points total on an annual basis for each calendar year 2021 and 2022. The minimum point total requirement increases to 6 points beginning in year 2023.

A table containing the BMP summary, the measurable goal, the implementation schedule, and points per activity is included in Appendix B: Table 6.

A short description of each planned BMP is included in the table below.

SECTION 3: Total Maximum Daily Load (TMDL) Regulated Pollutants

There are currently no TMDLs for the City of Mission.

SECTION 4: Water Quality Monitoring for TMDL Assessments

There are currently no TMDLs for the City of Mission.

SECTION 5: Permit Compliance Activities and Schedules

Year 2019:

• Annual report for 2018 submitted to KDHE by February 28, 2019

Year 2020:

• Annual report for 2019 submitted to KDHE by February 28, 2020

Year 2021:

• Updated Stormwater Management Plan submitted to KDHE by February 28, 2021
• Annual report for 2020 submitted to KDHE by February 28, 2021
• The City must implement sufficient listed BMPs to achieve minimum point requirements for 2021.

Year 2022:

• Annual report for 2021 submitted to KDHE by February 28, 2022
• The City must implement sufficient listed BMPs to achieve minimum point requirements for 2022.

Year 2023:

• Annual report for 2022 submitted to KDHE by February 28, 2023
• Provide report (in PDF format) on effectiveness of source controls and structural BMPs to attenuate pollutant discharge and achieve the measurable goals. The report must be submitted to KDHE with the 2022 Annual Report by February 28, 2023.
• The City must implement sufficient listed BMPs to achieve minimum point requirements for 2023.

Year 2024:

• Annual report for 2023 submitted to KDHE by February 28, 2024
• The City must implement sufficient listed BMPs to achieve minimum point requirements for 2023.

SECTION 6: Modifications to the Stormwater Management Plan

This SMP will be evaluated annually and modifications to the Plan, if any, will be submitted with the annual report.
For minor BMPs modifications/replacement: Within 60 days of a determination by the permittee or date of written notification from KDHE, the permittee shall modify the BMP if modifications are needed to maintain a program in compliance with this permit.

For major BMP modifications/replacement: These major modifications are defined as ones which normally take more than 60 days to construct and/or implement. Within 60 days of a determination by the permittee or date of notification from KDHE, the permittee shall provide a plan and schedule for the update/replacement of the BMP. The plan and schedule are subject to KDHE approval.

</tr>
</thead>
<tbody>
<tr>
<td>P Ed &amp; 0 - 01</td>
<td>Maintain a stormwater webpage for the permittee.</td>
<td>Maintain the webpage with up-to-date information with all links effective and valid information. Check all links and update website as necessary on a minimum monthly basis. Document monthly checks in log book and indicate changes with flagged summaries.</td>
<td>The webpage must be available throughout the year once it is posted and initially made available. In the initial year posted it must be available for a minimum of 3 months to qualify for the points. In subsequent calendar years the points may be claimed if the webpage has been maintained throughout the twelve months.</td>
<td>3 points may be claimed in the first year implemented, and 2 points may be claimed for each successive year the webpage is maintained available.</td>
</tr>
<tr>
<td>P Ed &amp; 0 - 02</td>
<td>Distribute educational materials (either flyers, brochures, catalog mailings, handouts, or e-mails) addressing various pertinent stormwater public education topics.</td>
<td>Number of all flyers, brochures, catalog mailings, handouts, or e-mails distributed in a year shall equal or exceed the most recent U.S. Census Bureau decennial housing units value for the permit area. The applicable U.S. Census housing units value shall be documented, and the number of flyers, brochures, or e-mails distributed shall also be documented. This information and copies of the flyers, brochures, or e-mails shall be retained on file.</td>
<td>Either flyers, brochures, catalog mailings, handouts, or e-mails are to be distributed in at least two separate batches, ideally in separate seasons (either winter, spring, summer or fall). However, the required number of flyers, brochures, or e-mails must be distributed in a single calendar year and the points can be claimed for that year.</td>
<td>2 points may be claimed in a year in which the required number of flyers, brochures, catalog mailings, handouts, or e-mails are distributed.</td>
</tr>
<tr>
<td>P Ed &amp; 0 - 05</td>
<td>Post the municipality's MS4 permit and BMP document on either the stormwater web page or the municipal webpage.</td>
<td>The two documents must be posted for at least six months of the year to claim one point.</td>
<td>Months for which the posting occurs must be within the year for which points are claimed. No &quot;carryover&quot; of months from one year to the next.</td>
<td>1 point may be claimed for posting each year (minimum of at least six months).</td>
</tr>
<tr>
<td>P Ed &amp; 0 - 06</td>
<td>Provide either a stormwater telephone hotline or web-based or text message method for public reporting of illicit discharges.</td>
<td>Respond to all reported complaints within 10 days and, if found valid, resolve or establish a schedule for resolution within 20 days. Actual resolution may take more than 20 days, but the schedule for resolution must be finalized and the efforts to implement resolution must begin within 20 days following receipt of complaint. Document complaints and response/resolution process for all complaints received in the year. Resolution of an illicit discharge can include, but is not limited to: elimination of the discharge, on-site treatment to allow discharge to the MS4 (normally requires an MS4 permit); redirecting the discharge to a location that the discharge is not considered illicit, i.e., sanitary sewer or to holding tanks to allow the waste to be hauled off for appropriate treatment, reuse/reuse or disposal.</td>
<td>The hotline/reporting system must be available to the public for at least six months in the year to claim the points.</td>
<td>2 points may be claimed for each year the hotline/reporting system is maintained and available. An additional point may be claimed for each illicit discharge resolved in the year up to a limit of 2 additional points per year. One point allowed per illicit discharge resolved.</td>
</tr>
<tr>
<td>P Ed &amp; 0 - 08</td>
<td>Provide stormwater education for students at a school campus within K-12 (those grades present at the campus) within the permittee’s jurisdiction or within 30 miles from this permit area. The training may be limited to the individual campus (local school buildings associated with a single address). This training does not need to be provided to the entire school system, e.g., USDA. Alternatively, funding stormwater BMP installations and/or field trips at the school campus will qualify.</td>
<td>Provide or fund an educator or speaker that will reach at least 5% of the K-12 students as normally attend school in the selected school campus. Alternatively, the funding of BMPs at the school campus may provide for any of the following: &gt; Installation of BMPs at the school &gt; Stormwater related field trips &gt; Water quality stream sampling activities &gt; Rain gardens on school property &gt; Rain barrel workshops &gt; Rain garden workshops</td>
<td>All of the required students (5% minimum) in K-12 at the selected campus must be educated in a single year to qualify for the points in that year. Alternatively, stormwater BMPs may be funded at a school campus where students may participate in installation or observe operation of BMPs. Any of the items listed under measurable goals qualify.</td>
<td>3 points may be claimed each year this BMP is implemented in compliance with the specified requirements (provide education and/or fund stormwater BMP installations at the school campus).</td>
</tr>

<tr>
<td>DDE-06</td>
<td>Implement a program to evaluate BMPs at facilities to identify illicit discharges. Inspect at least 15% of the known BMP wet weather outfalls during a calendar year and evaluate the ones which have dry weather discharges. Evaluate the water quality of the dry weather discharges to consider non-stormwater contributions and hence cause of any illicit discharge.</td>
<td>When at least 15% of the known BMP wet weather outfalls are inspected and for which at least one outfall was identified as discharging treated or untreated flow from illicit discharge, the affected points may be claimed in the year where the illicit discharge is eliminated. Because the BMP outfall is inspected, the outfall will be dry weather discharge and the BMP outfall is eliminated.</td>
<td>The evaluation of a group of at least 15% of the known BMP outfalls may be completed off in one year or may occur in up to two consecutive years and a point can be claimed. The larger number of points may be claimed only for the year in which the illicit discharge, associated with this group of evaluated outfalls is now eliminated.</td>

| P-C 01 | Develop and adopt a custom design manual for Post-Construction Stormwater Management which specifies the following standards:  
> Capture, at least, the first 0.5 inches of precipitation on the development/re-development site and utilize methods to prevent discharge off-site, including but not limited to:  
> Retain on-site  
> Infiltrate  
> Evaporate  
> Transpire  
> Or beneficially reuse  
> Through implementation of appropriate BMP(s) reduce the peak stormwater flow rate to a value equal to or less than the rate which would be experienced on the site prior to the development/re-development project based upon modeling a standard storm event, e.g., 1.0 inch-6-hour event assuming saturated soil conditions.  
> Other design or detention standards generally accepted by design engineers as adequate for the permittee’s local.  
As an alternative to a custom design manual the APWA 5600 Stormwater Design Criteria and the MARC/APWA BMP Manual may be adopted and implemented. Measures must be included to enhance the installation of the various structural BMPs required. | Development of the design manual can occur in any year.  
Initial implementation can allow points to be claimed in that year and continued implementation can allow points to be claimed in subsequent years. | 4 points may be claimed in the year of initial implementation of a custom design manual; alternately 6 points may be claimed in the year of initial implementation of the APWA 5600 stormwater design criteria and the MARC/APWA BMP Manual, 3 points may be claimed for each successive year compliance with the custom design manual is required/implemented.  
Alternatively, 5 points may be claimed in each successive year the implementation of the APWA 5600 stormwater design criteria and the MARC/APWA BMP Manual is required/implemented. | 6 | 5 | 5 | 5 | |
| P-C 05 | Develop and implement a program for inspection of permittee owned structural BMPs which includes implementation of needed maintenance to ensure long-term operation of the BMPs  
The program shall require inspection of at least 10% of the structural BMPs on an annual basis.  
Identified maintenance activities shall be completed:  
1. In the same year of inspection or  
2. Completed as dictated by the permittee’s maintenance/D&M plan  
3. Or a written plan for completion of the necessary maintenance shall be completed in the same year of inspection with the objective for completion of the maintenance activity within 18 months.  
The program shall be developed and implemented within a single year. | 3 points may be claimed in the year the program is initially developed and implemented, 2 points may be claimed for each successive year the program continues to be implemented. | | 3 | 2 | 2 | |

<td>P/P/G H - 04</td>
<td>Implement a program, with guidance to municipal staff or third party contractors, to ensure any municipal vehicle or other mechanical equipment washing is conducted in a manner which ensures the wash water is disposed of in the sanitary sewer or otherwise receives proper treatment prior to discharge to the environment.</td>
<td>Maintain proper wash facilities for municipal staff to wash vehicles and/or equipment or implement a program which includes guidance to municipal staff to take vehicles and/or equipment to commercial wash facilities, either of which ensures the wash water is conveyed to the sanitary sewer, or otherwise receives proper treatment prior to discharge to the environment, and not discharged untreated to the MS4 or directly to the environment.</td>
<td>The guidance document must be finalized and implemented in the year which points are initially claimed.</td>
<td>2 points may be claimed in the year the guidance document is finalized and implemented. 1 point may be claimed for each subsequent year the guidance document continues to be implemented. 1 point may be claimed for each subsequent year the guidance document continues to be implemented.</td>
</tr>
<tr>
<td>P/P/G H - 05</td>
<td>Implement a program for street sweeping in which the street sweepings are collected and disposed of properly or recycled/reused if possible.</td>
<td>All paved streets which can be swept shall be listed in the schedule for street sweeping. A log shall be maintained listing the street segments which are swept and, dates of sweeping and where the street sweepings are disposed of or where the material was sent to be recycled and/or reused. Alternatively, for municipalities with less than 500 population street sweeping can be limited to sweeping the gutters. The log which must be maintained need only indicate the street segments which were swept in the year and confirm sweeping was properly disposed of or recycled and/or reused.</td>
<td>All at least 10% of the streets which are listed in the street sweeping schedule must be swept at least once in a year to claim points for the year. In years in which street sweeping equipment is purchased, 2 points may be claimed for each year at least 10% of the listed streets are swept and street sweeping equipment is purchased. 2 points may be claimed for each year at least 5% of the listed streets are swept and street sweeping equipment is purchased. Alternatively, for municipalities with less than 500 population at least 10% of the street gutters which can be swept are swept in a year to claim points for the year.</td>
